Brand Exposure

Geosolution i Göteborg AB, a Sweden-based global provider of high-precision positioning solutions, operates through 11 international centers and a network of over 100 reputable dealerships worldwide. This infrastructure enables 24/7 delivery of timely services across all time zones.

By leveraging advanced innovations in GNSS, optical, LiDAR, and sonar technologies, complemented by proprietary data processing and analysis software, we empower clients across civil engineering, construction, mining, forestry, agriculture, hydrology, and marine sectors.

Through sustained R&D investment, SatLab enhances operational productivity while prioritizing user satisfaction. Our commitment extends to enabling customers' horizontal expansion and vertical specialization, unlocking new dimensions of operational mobility.
